1. Introduction

EduAirControl is a platform for managing, monitoring and controlling educational environments using IoT technology. It centralizes the information from environmental sensors installed in classrooms and other spaces of the institution and presents it in visual panels that are easy to interpret.

This manual explains in a simple way how to register, log in, navigate and make the most of each of the functions available to the User role, in both the web version and the mobile application.

2. Objective

To guide the end user step by step in using EduAirControl, so that they can consult the environmental information of educational spaces and personalize their experience without needing help from the development team.

3. Scope

This manual covers the functions available to the User role: landing page, registration, login, dashboard, environments, favorites, notifications, profile and settings. It does not cover the management of environments and sensors, which belongs to the Administrator role and is detailed in the Administrator Manual. Nor does it explain technical aspects (code, database or installation), which are documented in the Technical and Installation manuals.

4. System Overview

EduAirControl allows the user to:

- View, on a dashboard, the analysis of the data collected by the sensors (temperature, humidity and air quality).
- See the environments registered in the institution.
- Consult notifications: alerts, warnings and daily summary.
- Mark environments as favorites for quick access.
- View and review their profile information.
- Personalize the interface: theme, accessibility, language, date format, time zone and notifications.

5. Usage Requirements

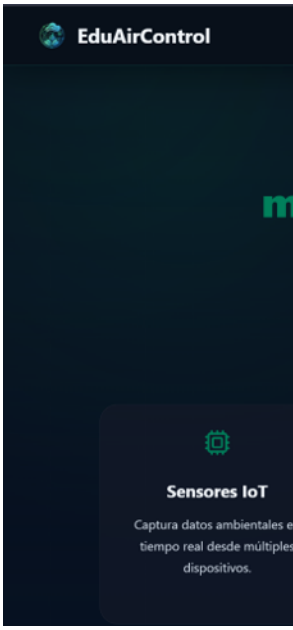

Resource	Requirement
Web version	Up-to-date browser (Google Chrome, Microsoft Edge or Mozilla Firefox).
Mobile version	Device with the EduAirControl application installed (developed in React Native).
Connection	Internet access or access to the network where the system is located.
Account	Registered user with an active email and password.
Access address	http://localhost:3000 (local development environment).

6. Accessing the System

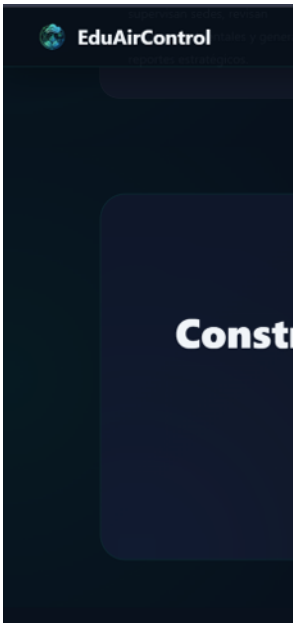

6.1 Welcome Screen (Landing)

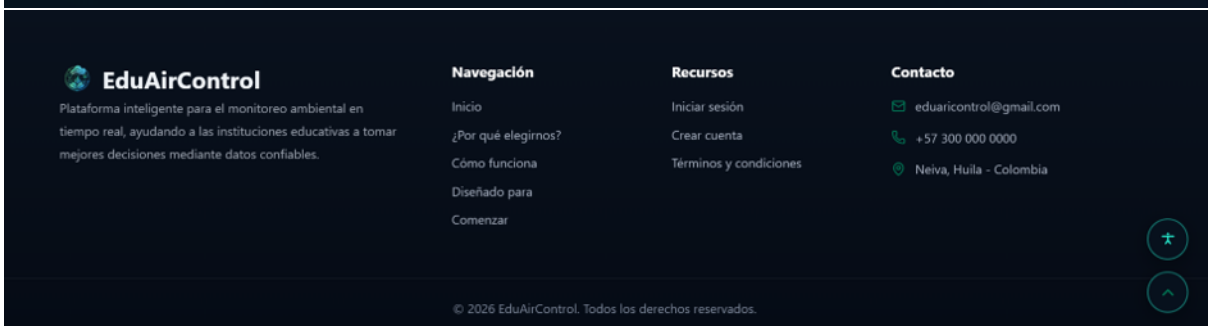

When you open the system's address, the welcome page is displayed. It introduces EduAirControl and offers the links to log in or register.

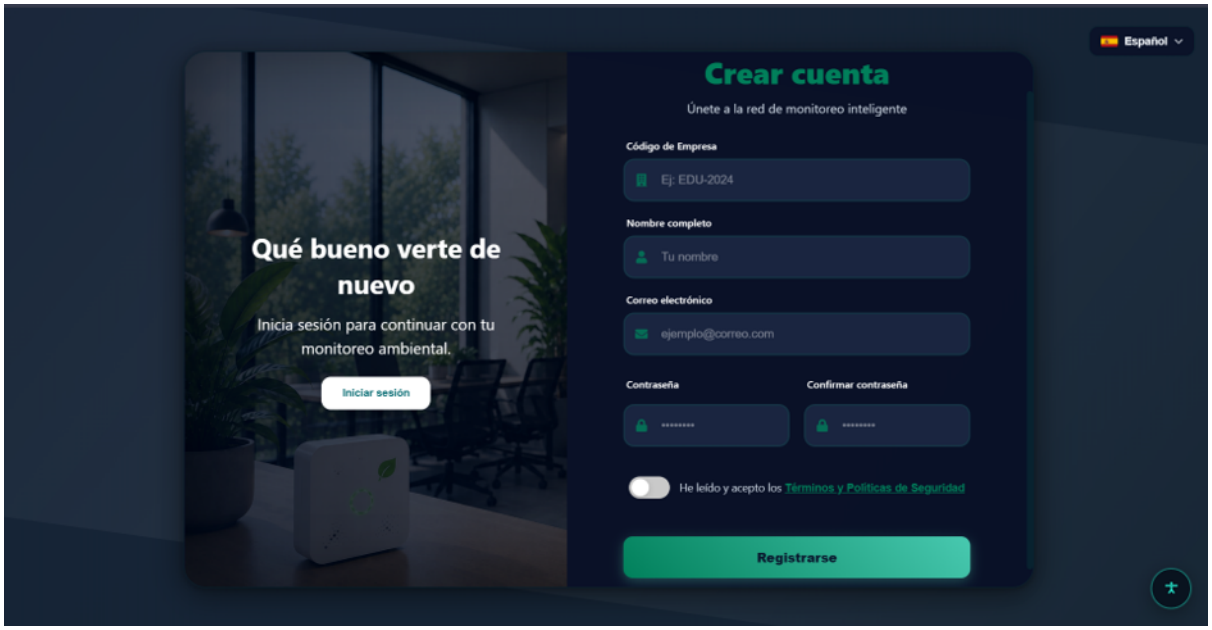

6.2 User Registration

Description	Allows you to create a new account to access the system.
Role that can use it	Visitor (without an account)
Route or menu	Landing > Register
Expected result	The account is created and the user can log in.

Description	Allows you to create a new account to access the system.
Notes	The same email cannot be registered twice. The password must meet the requirements indicated by the

Steps

1. Open the browser and go to http://localhost:3000.
2. Click the **Register** option.
3. Fill in the form fields: [COMPLETE: names, email, password, etc., according to your form].
4. Accept the terms and conditions, if the form requests it.
5. Click the register button.
6. Verify the confirmation message shown by the system.

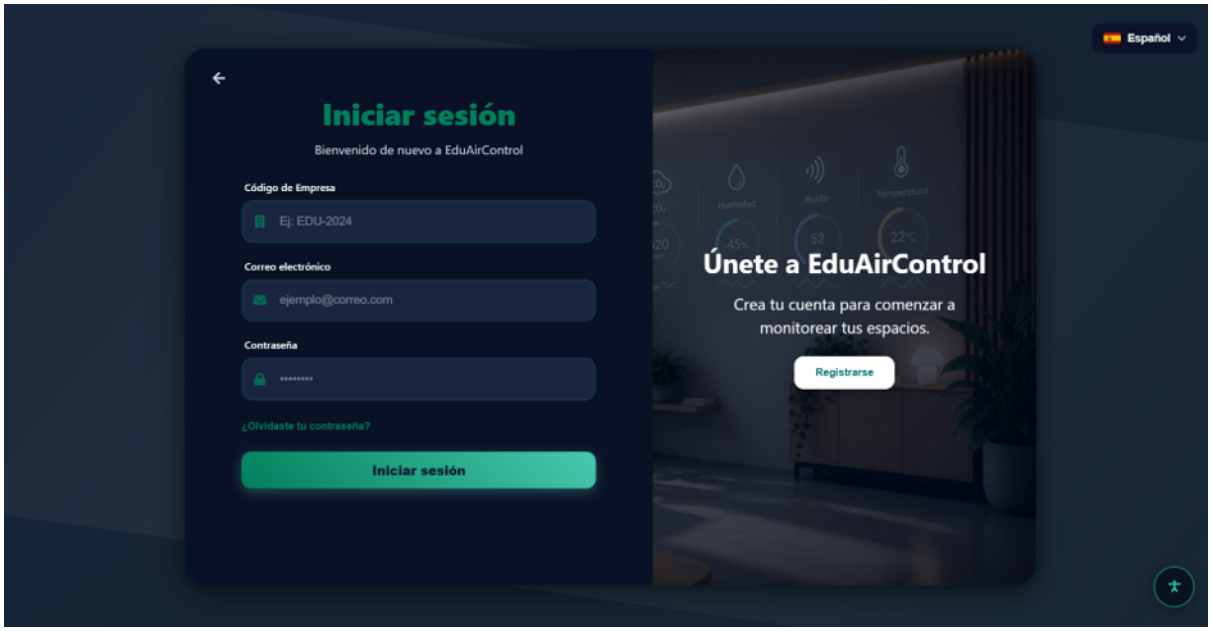

6.3 Log In

Description	Allows you to enter the system with the registered credentials.
Role that can use it	User and Administrator
Route or menu	Landing > Log in
Expected result	The system shows the main panel according to the user's role.
Notes	If the data is incorrect, the system shows an error message. Check that the email and password are type

Steps

1. Open the browser and go to http://localhost:3000.
2. Click **Log in**.
3. Enter the email and password.
4. Click the **Log in** button.

7. Main Menu

Once inside, the menu lets you navigate between the sections of the system:

Option	Description
Dashboard	Analysis of the collected environmental data.
Environments	List of registered environments.
Favorites	Environments marked as favorites by the user.
Notifications	Button that shows Alerts, Warnings and Daily summary.
Profile	Information the user registered with.
Settings	Personalization of the account and the interface.
Log out	Safe exit from the system.
Accessibility	Button to change the font size, the color blindness mode and the light or dark theme.

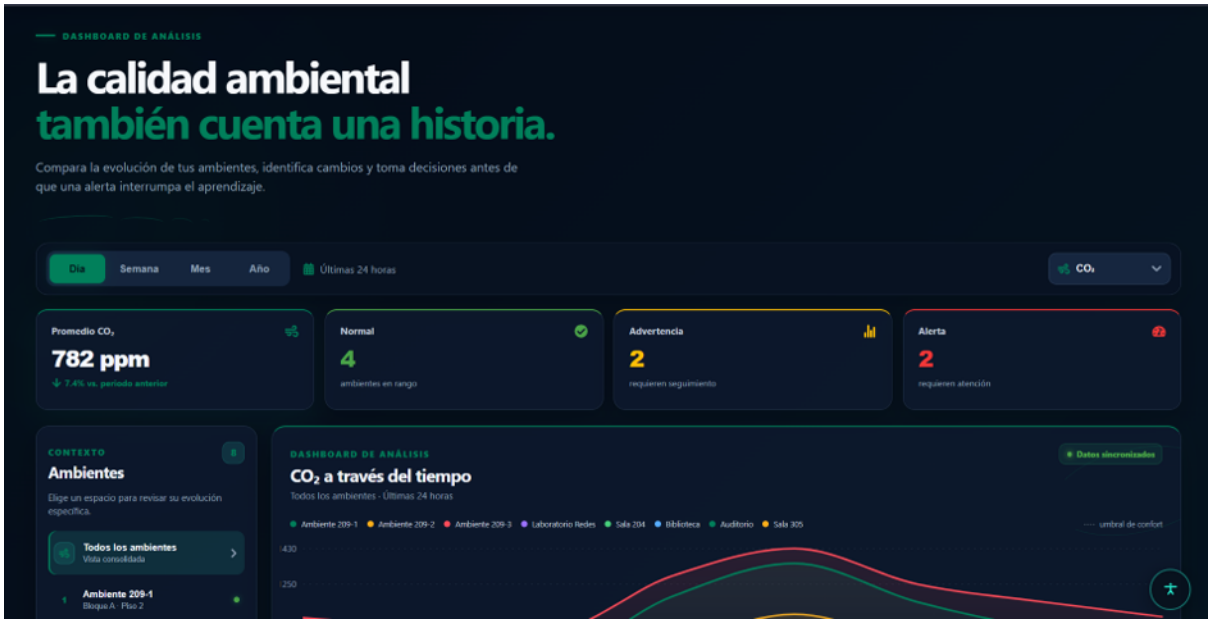

8. System Modules

8.1 Dashboard

Description	Presents the analysis of the data collected by the sensors in charts and indicators that make it easier to i
Role that can use it	User
Route or menu	Menu > Dashboard
Expected result	The user sees up-to-date environmental information for the monitored spaces.
Notes	The data depends on the measurements sent by the IoT sensors; if a sensor is inactive, no new readings

Steps

1. Log in to the system with an active account.
2. Select the **Dashboard** option from the menu.
3. Observe the indicators and charts for temperature, humidity and air quality.
4. [COMPLETE: use filters, date ranges or environment selection, if they exist].
5. Identify abnormal values that may require attention.

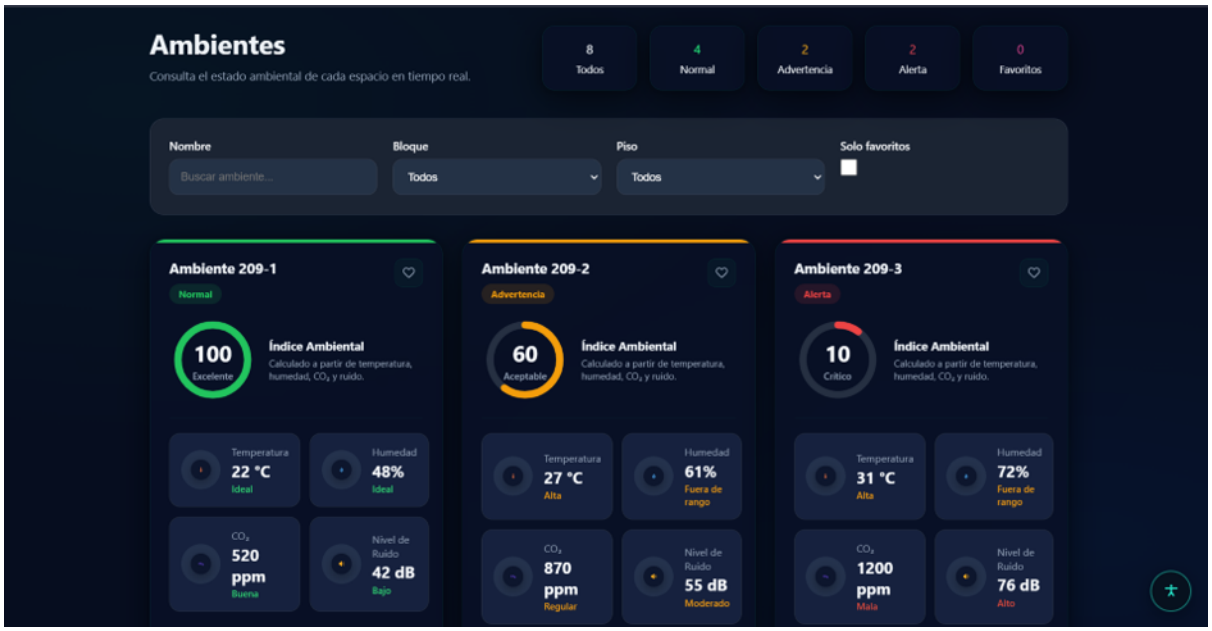

8.2 Environments

Description	Shows the environments (classrooms and other spaces) registered in the system.
Role that can use it	User
Route or menu	Menu > Environments
Expected result	The user views the environments and their environmental information.
Notes	The User role can only view; creating and editing environments belongs to the Administrator.

Steps

1. Select the **Environments** option from the menu.
2. Review the list of registered environments.
3. Search using the filters for name, block, floor and added favorites.
4. Click an environment to see its details and measurements.
5. To save it as a favorite, click the favorite icon [heart icon].

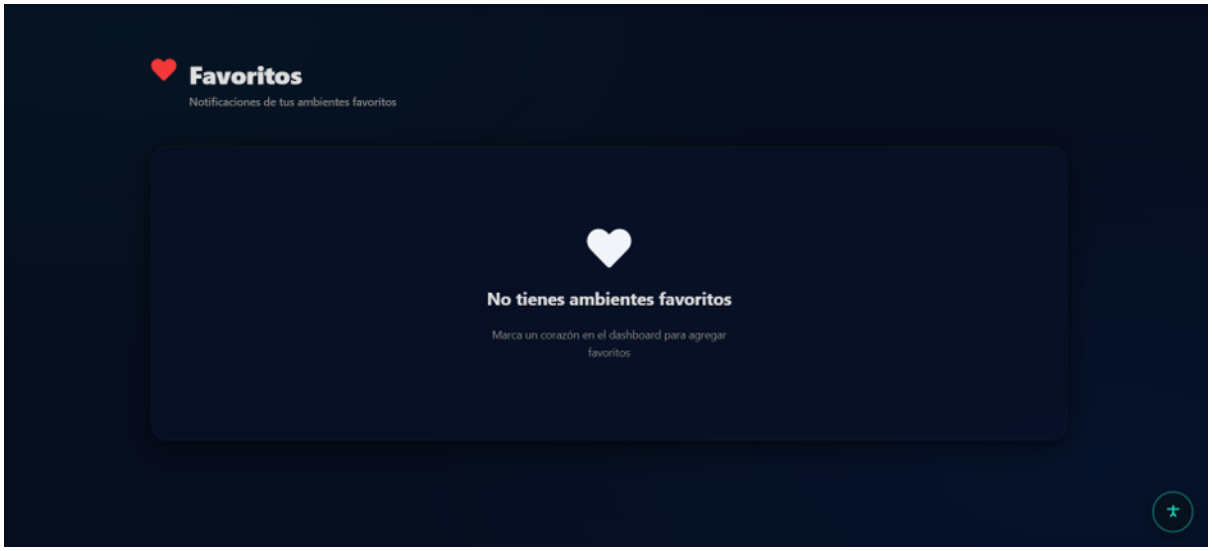

8.3 Favorites

Description	Allows quick access to the environments the user marked as favorites.
Role that can use it	User
Route or menu	Menu > Favorites
Expected result	Favorite environments are visible in a personal list.
Notes	Favorites are specific to each user and are not seen by other users.

Steps

1. From Environments, mark an environment as a favorite.
2. Select the **Favorites** option from the menu.
3. Verify that the environment appears in the list.
4. To remove it, unmark the favorite icon [Heart].

8.4 Notifications

Description	Shows the notices generated by the system about the status of the monitored environments, organized i
Role that can use it	User and Administrator
Route or menu	Main menu > Notifications
Expected result	The user views recent notices about their environments.
Notes	Alerts: generated when a measurement reaches a critical threshold. Warnings: generated when a meas

Steps

1. Log in to the system with an active account.
2. Click the **Notifications** button in the main menu.
3. Review the three types of notices: Alerts, Warnings and Daily summary.

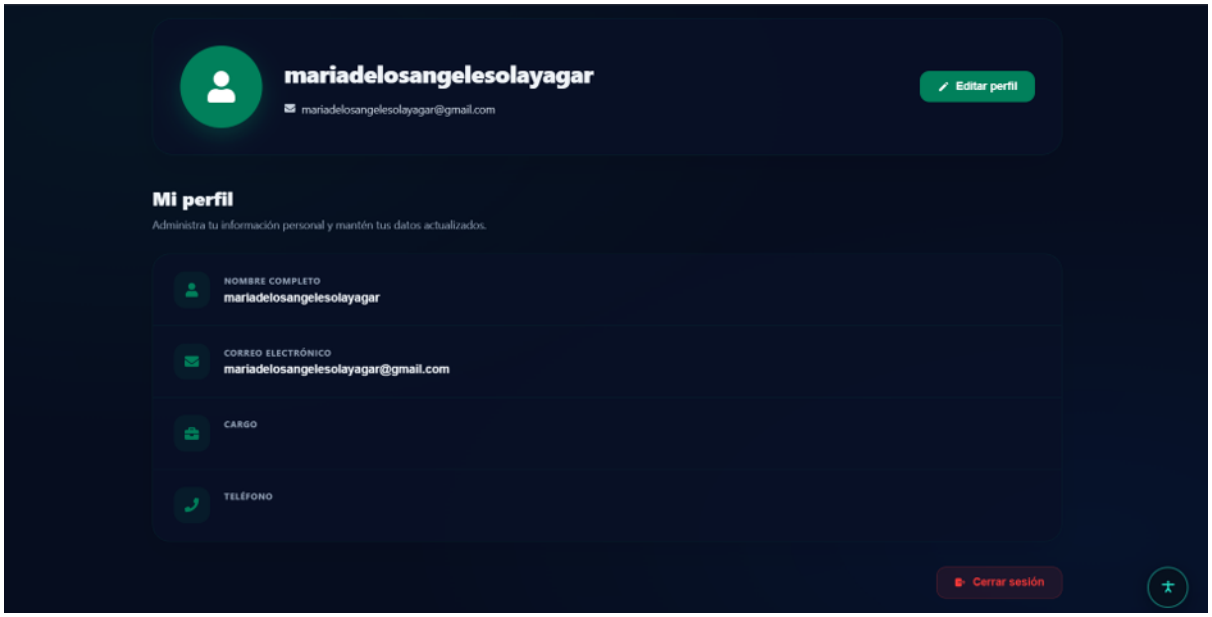

Type	Description
Alerts	Notices about critical environmental conditions that require attention.
Warnings	Preventive notices when a measurement approaches the recommended limits.
Daily summary	Summary of the behavior of the environmental conditions during the day.

8.5 Profile

Description	Shows the information the user registered with.
Role that can use it	User and Administrator
Route or menu	Menu > Profile
Expected result	The user verifies their personal information.
Notes	If any data is incorrect and cannot be edited, ask the administrator for support.

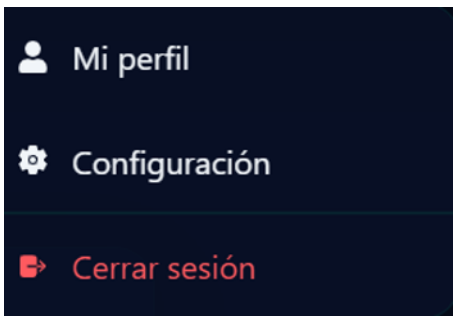

Steps

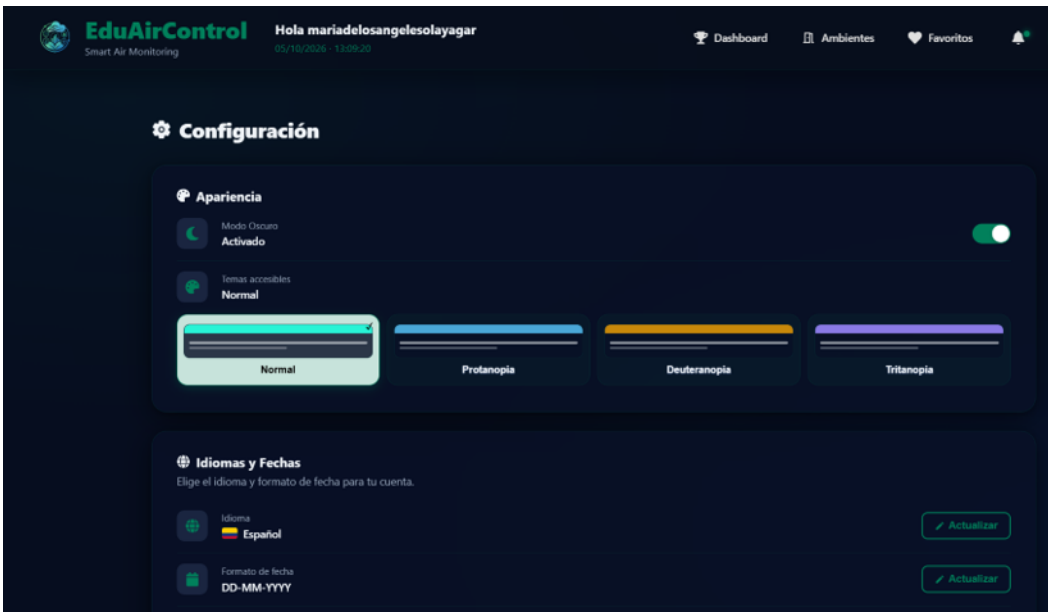

1. Select the **Profile** option.
2. Review the data shown: name, email, position and phone.
3. Edit data/photos and save.

8.6 Settings

This section gathers the account's personalization and security options. It is accessed from Menu > Settings.

Option	What it allows	How
Light / dark mode	Change the interface's visual theme.	Sel
Color blindness modes	Adapt the colors for people with color vision difficulties: protanopia, deuteranopia and tritanopia.	Cho
Language	Change the interface language: Spanish, English, Portuguese or French.	Ope
Date format	Define how dates are displayed.	Sel
Time zone	Adjust the time of the measurements to the user's time zone.	Sel
Reminders	Turn the system reminders on or off.	Mo
Privacy and security	View the terms and conditions and the privacy policies.	Ope
Change password	Update the access password.	See
Delete account	Delete the user's account.	See
Help and support	Get help on using the system.	Ope

8.6.1 Change Password

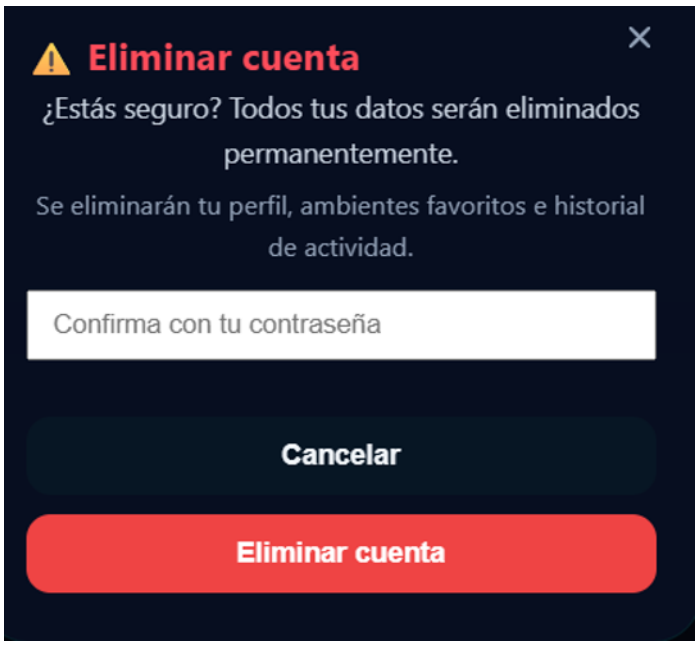

1. Go to Settings > Change password.
2. Enter the current password.
3. Enter the new password and confirm it.
4. Click **Save** or **Update**.
5. Confirm that the system shows the success message.

8.6.2 Delete Account

Attention: deleting the account is a significant action. It is recommended to confirm whether the deletion is permanent in the system before documenting it as irreversible.

1. Go to Settings > Delete account.
2. Read the warning message carefully.
3. Confirm the action (password and requested confirmation).
4. Verify that the system logs you out and does not allow you to log in again with that account.

8.6.3 Reminders Allows you to turn the system reminders on or off using a switch. The notices generated by the system are consulted in the **Notifications** button of the main menu (section 9).

- Notify critical alerts
- Notify warnings
- Daily summary
- Notification sound

1. Move the switch to turn the reminders on or off.
2. Verify that the switch is in the desired position. The change is applied automatically.

Expected result: the system sends reminders only when the switch is on.

They arrive via (screen and email on web, and via phone notification on mobile).

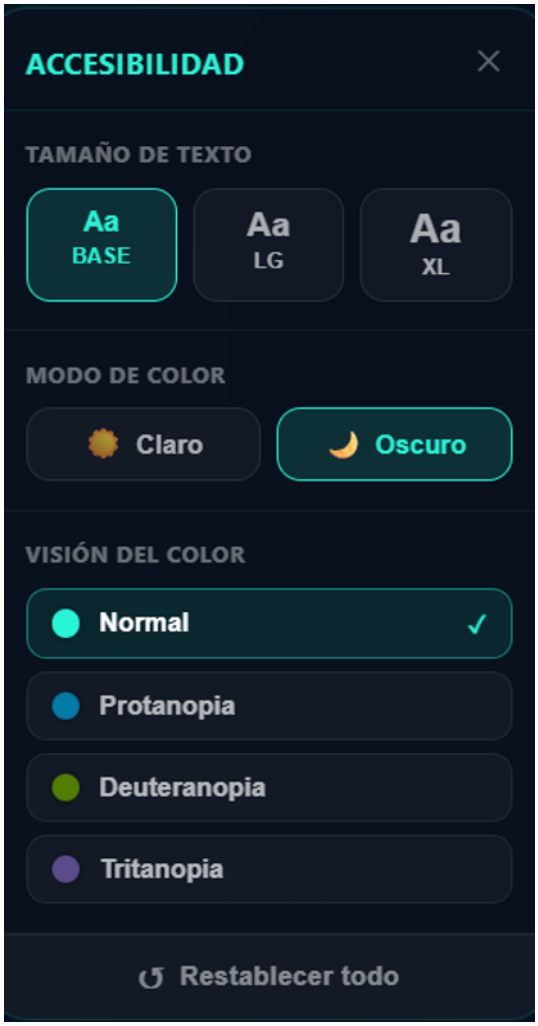

9. Accessibility

Description	Allows you to adapt the interface to the user's visual needs through the accessibility button. From there y
Role that can use it	User and Administrator
Route or menu	Accessibility button at the bottom of the screen
Available options	- Font size: lets you choose between three sizes: Base (normal size), LG (large) and XL (extra large).- C
Expected result	The interface is shown with the font size, colors and theme selected by the user.
Notes	Preferences are saved for the next session. It is recommended to choose the font size and color mode th

Steps

1. Log in to the system with an active account.
2. Click the accessibility button.
3. To change the font size, select Base, LG or XL.
4. To adapt the colors, select the corresponding color blindness mode (protanopia, deuteranopia or tritanopia).
5. To change the theme, select Light mode or Dark mode.
6. Verify that the interface updates with the chosen option.

10. Messages and Validations

Replace the texts in the ”Message” column with the exact messages shown by EduAirControl.

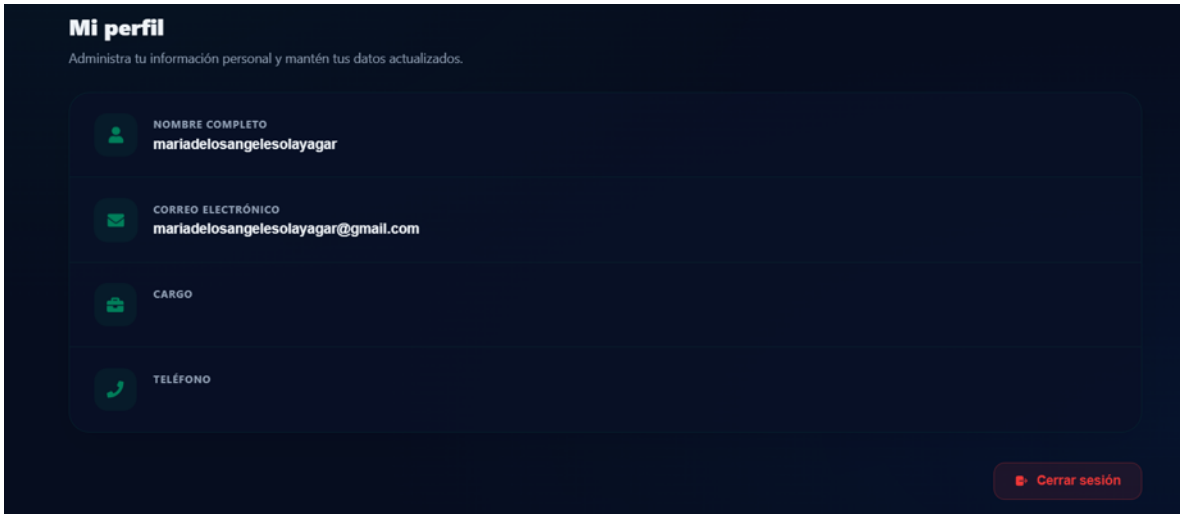

System message	Meaning	User action
Required field	A required piece of data is missing.	Fill in the marked field.
Registration successful	The account was created successfully.	Log in.
Invalid credentials	The email and password do not match.	Check the data and try again.
Email already registered	An account with that email already exists.	Log in or use another email.
Password updated	The password change was successful.	Use the new password at the next login.

11. Logging Out

1. Locate the **Log out** option in the menu or profile.
2. Click **Log out**.

3. Verify that the system returns to the login screen.

It is recommended to always log out when finished, especially on shared computers.

12. Frequently Asked Questions

Question	Answer
What do I do if I forgot my password?	There is a ”Forgot my password” option in settings.
How do I change the language?	Go to Settings and choose the language in the selector (Spanish, E
How do I add an environment to favorites?	From Environments, click the favorite icon of the desired environm
Where do I see the alerts, warnings and daily summary?	In the Notifications button of the main menu.
How do I turn reminders on or off?	Go to Settings > Reminders and move the switch.
How do I activate dark mode or the color blindness mode?	In Settings, select the desired mode in the appearance and access
I don't see new data on the dashboard, what do I do?	The data depends on the sensors. If there are no recent readings,
How do I make the text larger?	Click the accessibility button and select the LG or XL size.

13. Glossary

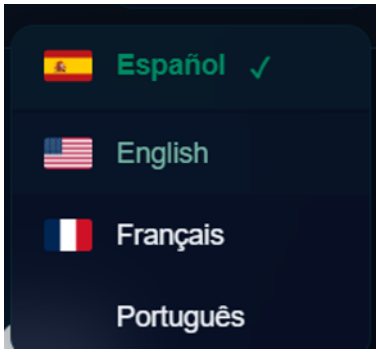

Term	Definition
IoT	Internet of Things: connected devices that send data over the internet.
Sensor	Device that measures an environmental condition, such as temperature or humidity.
Environment	Classroom or other space of the institution monitored by the system.
Dashboard	Visual panel that summarizes and analyzes the collected data.
Notification	Notice generated by the system: alert, warning or daily summary.
Favorite	Environment marked by the user for quick access.
Color blindness	Difficulty distinguishing certain colors; the system offers adaptation modes.
Time zone	Time region used to display dates and times.
Accessibility	Set of options that adapt the interface to the user's visual needs, such as font size and color modes.
